

### V2.3.1

🔗 [a9b3a554](#) · [Delete unwanted folders](#) · 2 months ago

#### Bug Fixes:

- add macros to enable GPIO UART print

#### Features:

- support 8278 A2 chip
  - optimize the voice delivery process and resend voice data at 16K sampling rate
- 

### V2.3.0

🔗 [5d927e27](#) · [update 8278 A1 drivers](#) · 2 months ago

#### Bug Fixes:

- fix parameter error of queue in USB CDC TX function
- update 8258 ADC driver to avoid ram being flushed by ADC data
- optimize the continuity of the audio waveform by dongle only reporting valid voice data

#### Features:

- support 8278 A1 chip
  - change the pairing key of 8278 RCU back to sw5
  - add frequency hopping function when transmitting voice data
- 

### V2.2.0

🔗 [24affa29](#) · [add 8278 chip](#) · 3 months ago

#### Bug Fixes:

- update 826x adc driver to improve the battery detection precision

#### Features:

- support 8278 A0 chip
  - change the 8278 RCU's pairing key to SW23, 8258/826x RCU remain unchanged
- 

### v2.1.0

🔗 [407510e7](#) · [add rf4ce sdk](#) · 6 months ago

GitServer : <ssh://gitolite@192.168.48.47:222/zigbee> branch: telink\_zigbee SHA-1: a21ca21bb33a2ac9b6

#### Bug Fixes

- fix mac address issue
- fix quick set IR toggle bit issue

#### Features

- Auto-generated ota file in the proj
- add rsp code in the callback function for pushing attribute response
- add callback for all of the command, optimize the discovery procedure
- change led action for pair, audio issue for 8258
- add demo for rf4ce/ble switch
